HEALTH BUSINESS CONNECT
Micro & Nano MEETS
Medical Innovation

**Health Business Connect –
Micro & Nano MEETS Medical Innovation**

Dear Sir or Madam,

For the second time the IVAM Microtechnology Network, in cooperation with the French partner Pôle des Microtechniques, is going to organize the „Health Business Connect – Micro & Nano MEETS Medical Innovation“ on July 5-6, 2017, this time in Dortmund, Germany.

The main focus of the Health Business Connect is furthering cooperation between component manufacturers and medical device manufacturers from Germany, France and other countries as well as joint projects, experience exchange and potential opportunities for cooperations. In addition to organized business meetings, there will be interesting keynote lectures as well as a networking lunch for further exchange among the participants. In addition there will be a visit at Fraunhofer ISST – Institute for Software and Systems Engineering – on “Digitalization in HealthCare”.

The event is aimed at medical technology companies on the entire value chain: technology developers, component manufacturers, software, test and analysis businesses and medical device manufacturers.

The Health Business Connect 2017 will be linked to the Dortmund MST Conference, which will take place on July 5, 2017. At the conference, which is under the motto „Individualized Healthcare Solutions“, international experts from companies and research institutes will present technical trends for individualized medicine and healthcare.

The participants of the Health Business Connect are welcome to attend the MST Conference free of charge. On the evening of July 5, there will be an accompanying program with a city tour and networking dinner, in which the participants of both events can get together and network.

We look forward to seeing you at Health Business Connect!
